WRAPPERS TO WRAP DOORS AND WINDOWS,
INCREASING PRODUCTIVITY AND
EMPLOYEE WORKING ERGONOMICS.**

**SOLUTECH OPTIONS HELP CUSTOMERS
DELIVER QUALITY PRODUCTS IN A
TIMELY MANNER !!**

***Solutech stretch wrappers can be
adapted to your specific needs !!***

This stretch wrapper is installed in a production line, the operator easily moves the doors onto a gravity conveyor up to the vacuum lifting device, since the weight is supported by the conveyor. With the vacuum lifting device the operator raises the doors to apply corner protections on all four corners.

When done, the operator will move the doors on the gravity conveyor up to the stretch wrapper. When pressing on a button, the top hold down will hold the top of the door leaving the operator free to lock the conveyor rollers with a foot pedal on the turntable. Then the operator is free to move around the machine to fix the stretch film to the doors and start the stretch wrapper.

***Solutech provided different
solutions for this customer:***

Objectives :

One man operations; loading the doors onto the lifting conveyor station, easily applying all four corner protectors, easily transferring the doors onto the turntable wrapper, holding the doors in place always with one person, wrapping the load, ensuring the doors do not get deformed upon applying stretch film and reloading the doors in a cart.

Objectives achieved at reasonable costs
