***Solutech stretch wrappers can be  
adapted to your specific needs !!***

This stretch wrapper was design to wrap standard doors and windows with conventional stretch film, however certain products, that are shipping long distances and of high value needed additional protection, Solutech build a dual carriage machine able to apply stretch film and foam.

The stretch film is holding the foam in place while wrapping, the machine was designed, with a special program to be able to wrap one way only if needed limiting the cost of film while providing adequate protection.

A foot pedal is used to activate the top platen to stabilize the top of the products leaving the operator free to attached the film and foam when needed.

Products sizes: Height from 24" to 114'  
Width 11" to 100"  
Thickness 4"to 14"

***Solutech provided different  
solutions for this customer:***

### ***Objectives :***

For high value doors or windows the customer wanted additional protection, fencing and light curtain used to wrap two Solutech design a system capable of economically wrapping certain products with stretch film only, and other products with stretch film and foam.

***Objectives achieved at reasonable costs***
